Summary

Computer Science undergraduate (B.Tech, 2027) with expertise in Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, and OOP. Proficient in MERN stack, React.js, Node.js, Firebase, RESTful APIs, and cloud platforms (Azure, GCP). Skilled in Agile workflows, unit testing, debugging, and building scalable, real-time web applications, with strong problem-solving, communication, and cross-team collaboration skills."

Education

Amity University, Jharkhand, BTech in Computer Science	May 2023 – May 2027
Sarala Birla Public School, Class 12th (CBSE)	March 2023
Sarala Birla Public School, Class 10th (CBSE)	March 2021

Skills

Languages: Java, JavaScript, HTML, CSS, Python, Dart (Basics)

Technologies: React.js, Tailwind CSS, Bootstrap, Node.js, Express.js, Firebase, RESTful APIs

Databases: MongoDB, SQL, Firebase Realtime DB

Cloud & DevOps: Microsoft Azure, Google Cloud Platform, Git, GitHub, Netlify, CI/CD pipelines, Agile workflows.

Experience

Web Developer Intern, Trippu – Jaipur, India (Remote) July 2025 – Oct 2025

- Developed and deployed a dynamic service provider website using React.js, Node.js, and MongoDB, enabling providers to create profiles, list services, and manage bookings seamlessly.
- Implemented RESTful APIs to handle service listings, booking requests, and real-time updates, ensuring smooth communication between users and providers.
- Optimized website for mobile and desktop using responsive design and Tailwind CSS, resulting in 40 % faster load times and better user engagement.

Front-End Developer (Freelance), Illuminate Stores – Ranchi, India Oct 2024 – Dec 2024

- Built SEO-optimized, responsive e-commerce pages using HTML, CSS, and JavaScript.
- Enhanced website traffic by 30% by developing and deploying reusable UI components.
- Applied responsive design best practices to ensure 100% mobile compatibility and consistent user experience across devices, improving engagement on mobile by 30%

Projects

Skill-Linker github.com/SkillLinker/repo

- Tools Used: React.js, Node.js, Express.js, MongoDB, Firebase, Socket.IO, Tailwind CSS, MongoDB Atlas, etc.
- Developed a full-stack MERN platform enabling geo-location based job matching between local service providers and seekers using MongoDB Geo Indexing and Mapbox.
- Implemented a real-time communication system using Socket.IO, allowing users to chat instantly, schedule bookings, and negotiate job terms securely.

CampusCatalysts github.com/repo

- Developed a centralized campus collaboration platform enabling project matchmaking, resource sharing, and real-time communication for students.
- Integrated Render backend for authentication, data storage, and real-time updates, enhancing platform scalability and usability.
